

Specific Hazard Training

e.g. noise, hazardous substances

To manage OHS effectively, you need to know what hazards are present in your workplace and how to control them. Legislation sets down minimum standards as to how certain hazards must be controlled. You need to know what these standards are to make sure you are managing your hazards effectively. This training will provide you with the information you need to understand specific hazards present in your workplace and how you must control them to be compliant.

Training Outcomes:

- Find information on specific hazards and required controls
- Identify hazards in the workplace
- Understand how those hazards may cause harm
- Analyse hazard case studies
- Build in new hazard control measure to further reduce risk
- Use the OHS Regulations and Compliance Codes in hazard control
- Fulfill statutory obligations with regard to specific hazard control

3 Steps to getting your Specific Hazard Training action plan:
